KEY		
Proprietor Unit: The department/unit with primary responsibility for determining the purpose and function of a data resource.		
Data Resource: A resource that involves the processing, transmitting, or storage of data, as well as the data itself. Data resources include but are not limited to databases, application systems, operating systems, communications systems, tools, data - in raw, summary and interpreted form - and associated computer server, desktop, communications, and other hardware.		
** Denotes a Data Integration System. A majority of the data contained in this system may be that of other data proprietors.
